**LEGNO**

Insieme dei tessuti vegetali [xilema] che formano la parte solida del fusto, dei rami e delle radici degli alberi. La parte più vecchia e più interna del tronco è detta durame, la parte più giovane e periferica albarno. Il legno sin dall'antichità ha trovato notevoli applicazioni nella produzione della carta, nell'edilizia, nell'industria manifatturiera.

**WOOD**

The group of vegetable tissues [xylem] that form the solid part of the tree trunk, branches and roots. The oldest and innermost part of the trunk is also known as hardwood, while the youngest and outermost part of the trunk is known as sapwood. Since antiquity, wood has been widely used to make paper, in the building and manufacturing industries, in design.
